

# PlanCommand® ProjectShare Benefits

*Providing communications tools required by today's  
General Contractors and Project Managers*

## A competitive and economical alternative to the FTP project sites

- No software or upgrades to manage required.
- Administered by the team... for the team!
- No ongoing site maintenance required by users.
- Secured project data accessible via any HTML browser.
- No limit on the number of projects or number of team members/users using the system.
- Customizable interface enables the user to brand it with their company information.
- High speed uploads and downloads of project files.
- No limit on the file types stored.
- Send and receive multiple files in a single transfer.
- Provides an offsite back-up of all project files.
- 24/7 availability to project information maximizes team productivity.
- Team members – view, download files or order prints.

## Take Control... It's your project... Manage it your way!

- Customize your company site with your company branding — name, logo, etc.
- Manage multiple projects at the same time, each with unique and different team members.
- Easy to use interface provides team members a common forum to access team files — plans, specs, legal docs, permits, test data, operation manuals, as-built drawings, and more.
- Control team member access to sensitive project information on a “need-to-know” basis utilizing easy to administer project address book user access.
- Time-honored folder/file format affords maximum efficiency in handling the organization, presentation and monitoring of critical project data.
- Work without limits on the number of files on the site or the number of team members assigned to the project.
- Stay informed of all project notifications related to Change Notices, RFI's and General Notices to verify both the receipt and viewing by the recipients.
- Include attachments with the notices sent from your site.
- Maintain an audit trail of notifications throughout the entire project lifecycle.
- Invite and easily add “preferred status” suppliers already qualified and included in a “Company Address” book to ANY project.
- Create and administer a “Project Address Book” specific too EACH project being managed with unique user access rights.
- Easily transfer service providers and vendors with “preferred” status from “Company” to “Project” address book.
- Upon completion of the project seamlessly transition stored files from construction phase to archive status preserving them for facility management needs in the future.
