

# PlanCommand® ProjectShare Benefits

*Providing communications for today's construction team environments*

**A new era in construction project management is upon US. The need to effectively and efficiently manage project communications and documents has never been keener...**

## **Taking the next step... Beyond FTP file transfer and storage**

- No software or upgrades to manage required.
- No ongoing site maintenance required by users.
- Secure web based solution accessible from any HTML browser.
- No limit on the number of projects or number of team members/users using the system.
- Customizable interface enables the user to brand it with their company information.
- High speed uploads and downloads of project files.
- Site control and access managed by the client.

## **Welcoming a "new" era in construction with a straightforward approach to team-based project communications**

- Provides team members a common forum for document control and review of team files — plans, specs, legal docs, permits, test data, operation manuals, as-built drawings, and more.
- Universally accepted folder/file structure affords the team unlimited storage and maximum efficiency in organizing critical project data.
- Easy to use web-based interface maximizes team productivity to organize, view, add and distribute project documents anytime, anywhere, 24/7.
- Notifications related to Change Notices, RFI's, General Notices are easily submitted and tracked to verify both the receipt and viewing by the recipients.
- An audit trail of notifications is maintained throughout the projects lifecycle.
- Team member access to sensitive project data is managed by an easy to use password protocol.
- Centralized communication platform provides a uniform structure for all team members to utilize.
- Concurrently manage multiple projects involving team member alignments with shared or unique member configurations.
- Maintain "Company Address Book" of preferred contacts to select from and add to ANY company project.
- Create and manage a unique "Project Address Book" for EACH project.
- Easily transfer invited team members from "Company" to "Project" address book.
- Seamlessly transition stored files from active to archive status upon completion of construction.
